

BRIT

Risk Management Services

Brit Cyber Services

Advancing cyber resilience beyond risk transfer

In a world where cyber risk impacts revenue, reputation, and resilience, insurance alone isn't enough. We combine cover with insight and action to help leaders stay ahead of risk, not react to it.

DataSafe

Available to all Brit primary insureds - DataSafe's tools, training and threat intelligence help manage cyber risk.

- Cyber threat alerts and security news
- Critical vulnerability notifications (CVE alerts)
- Unlimited one-to-one access to Chief Information Security Officer (CISO) expertise
- Policy and procedure templates
- Security awareness training modules
- Phishing email simulations
- Cyber risk webinars and briefings
- AI readiness assessments

Outside-in security scanning

- Attack surface vulnerability reports (powered by Security Vue) - continuous scanning of a client's online systems to identify weaknesses.

Discounted Cyber Security Services

As a Brit primary client you have access to additional cyber security services at a discounted Brit rate.

- Threat Modelling
- Red Teaming
- Pen test
- NIST Assessment (Independent)
- Physical Pen Testing
- MDR Service
- Threat Landscape Reporting - Quarterly
- Purple Team
- Key Person Assessment (KPA) Three people
- Objective-Based Penetration Testing

Discounted Vendor Licenses

As a Brit primary client you have access to discounted licensing (up to 30%) from the following vendors:

- **CrowdStrike** - CrowdStrike secures the most critical areas of risk; endpoints and cloud workloads, identity, and data, to keep customers ahead of today's adversaries and stop breaches.
- **Tenable** - Tenable helps prioritise & fix cyber risk, in the cloud and on-prem, using robust security, vulnerability management and compliance tools.
- **KnowBe4** - KnowBe4 provides interactive security awareness training and simulated phishing campaigns to help organisations protect themselves from cyber threats.
- **Dragos** - Dragos makes defence doable with the industry's most intelligent and intuitive cybersecurity platform for Operational Technology.
- **Opswat** - Opswat provides advanced threatprevention and critical-infrastructure security through its MetaDefender platform, which combines multiscanning, deep content disarm and reconstruction (Deep CDR).
- **Zerofox** - ZeroFox's Takedown Service rapidly removes malicious online infrastructure, including phishing domains, impersonating social media accounts, fraudulent apps and marketplace scams.

BreachBits

Brit uses BreachBits outside-in scanning technology to identify verified attack paths and emerging cyber threats, helping clients prioritise remediation and reduce exposure.

This technology filters out false positives so only viable and verified attack paths that can be exploited are surfaced to the recipient.

Brit will notify clients and brokers of emerging threats so action can be taken.

continued

Risk Management Bursary Services

Clients could access one of the below:

- Incident Response Playbook review (up to x5 playbooks)
- M365 Assessment
- Microsoft Azure Assessment
- Active Directory Assessment
- Cyber Essentials Basic Certification
- Cyber Essentials Basic Certification + Support
- Digital Attack Surface Assessment (DASA)
- C-suite State of the Nation Awareness session
- Threat Landscape Reporting
- IR Tabletop Exercise
- IR Tabletop Workshop
- Business Continuity Planning Workshop
- Cyber Risk Assessment Workshop
- Third Party Criticality Supplier Review
- Baseline Information Security Assessment (BISA)
- GDPR Regulatory & Compliance Review
- IR Policy & Plan Review
- Cyber First Responder Training
- Phishing Resilience Assessment
- Phishing Resilience Assessment + Simulation
- Key Person Assessment (KPA) – One Person
- Deepfake Demo

Refer to Brit's Risk Management Services matrix for details of the number of services available to clients.

Post-Bind Debriefs

These are performed by Brit's in-house cyber consulting team for Brit primary clients. These give insight to how the insured has performed as part of the underwriting process. Including but limited to:

- Items that the insured does well from a cyber risk management point of view.
- Areas for enhancement based on the underwriting review process.
- Benchmarking with peers across key cyber control domains.
- Threat intelligence tailored to the industry subsector and domiciled geography.

Brit Cyber Claims App

- Available to all Brit Primary insureds through the Apple App Store and the Google Store.
- The app assists you in contacting our 24 hour breach response line and correctly and promptly notifying claims.
- Access to Brit Cyber Knowledge Hub

Axio

- Axio provides cyber risk quantification to help educate clients on the exposure they may have from a malicious cyber event that causes physical damage.
- Brit will facilitate the production of the report – all that is required is an IT and OT cyber application form and a Statement of values. Axio will then run its proprietary modelling over the top of this which is then layered with outside in-scanning and Dragos threat intelligence to craft specific loss scenarios to the client.
- Axio are the two-time Forrester "Leader" in Cyber Risk Quantification Wave Report, Cyber Physical Product of the Year (2024) and Cyber Technology Provider of the Year (2025) at the EU Intelligent Insurer Cyber Awards.
